

ST7U

USB Condenser Microphone

Samson's ST7U USB Condenser Microphone is an affordable solution for capturing studio-quality audio on your computer. The ST7U's solid, die-cast body houses a large condenser capsule, as well as a headphone output for zero-latency monitoring. Perfect for recording music, it's also a full-featured vocal mic that will greatly improve vocal quality in all VOIP programs.

With an internal shock-mounted mic element and a cardioid pickup pattern, the ST7U is able to capture the natural brilliance and emotion of spoken word, instrument and vocal performances without unwanted noise. The mic's headphone output offers low-noise D/A conversion, leading to high-quality audio playback when connected to headphones or computer speakers. A Mute switch is also provided for use when necessary interruptions arise.

The ST7U comes with a tripod stand and mic clip, allowing for optimal mic placement anywhere on your desk. It's compatible with iPads and iPhones (4S and later) using Apple's Lightning USB Camera Adapter or Camera Connection Kit (30-pin). Offering plug-and-play operation with no driver installation needed, the ST7U is USB powered and requires no additional power cables or batteries.
